

DDR-669-62

24 October 1962

MEMORANDUM FOR: Assistant Director, Office of ELINT

25X1A SUBJECT: [REDACTED] Proposals

1. Reference is made to a conversation between Mr. Miller and Colonel Giller on 24 October on the above subject.

2. This proposal is being returned as per the above discussion. It is believed desirable that more specific comments be made regarding

- a. Technical feasibility
- b. Power requirements
- c. Geographical areas, if technically feasible

3. If the concept will work technically, then questions of power, geography, and target should be considered on a world-wide basis. Perhaps one of your consultants, or a contractor with no proprietary interest, might do a little more thorough analysis of this idea. Since this is in the realm of more long-range research, perhaps you can approach it in a more orderly fashion starting with theory and some modest experiments, being able to cancel at any time the project looks technically infeasible.

YLL

EDWARD B. GILLER
Assistant Deputy Director
(Research)
